

District Heating Network in Cultybraggan

Not only in Germany is the demand for district heating systems continuously growing. So ENERPIPE converted the former Scottish military prison Cultybraggan into a modern business park with district heating from renewable energy sources.

All figures, data and facts

- Total length of route: 212 m
- Connection users: 5
- Heat output: 198 kWth
- Heat consumption: 200.000 kWth
- Buffer storage: 10.000 l
- Wood chip heating system: 198 kWth
